PROJECTS

May 2026 – Present

Ominimo Insurance

Role Android Developer

Role description

Implementing a native Android telematics solution for usage-based insurance, capturing and processing real-time driving and sensor data to support risk assessment and personalized policies.

Tech Stack Kotlin, Android SDK, Jetpack (Coroutines, Room, WorkManager), Google Location & Sensor APIs, Retrofit

Nov 2025 – Jan 2026

South Caroline Family Court

Role Senior Web Engineer

Role description

Leading the migration of a legacy AngularJS application to Angular 19, enhancing code quality, optimizing performance, and modernizing development processes. Responsible for refactoring legacy code, resolving issues, mentoring junior developers, reviewing pull requests, and guiding complex implementations.

Tech Stack Angular 19, RxJS, TypeScript, Bootstrap 5

Nov 2024 – April 2026

The Baltazar TV

Role Leading Web Engineer

Role description

Led the end-to-end development of a real-time platform consisting of an admin web application, PWA mobile apps (iOS and Android). Designed and built the NestJS backend with WebSocket-based real-time communication, MySQL for data persistence, and Firebase integration for push notifications.

Tech Stack NestJS, MySQL, Next.js, Flutter, Firebase, Websockets, Stripe API, TurboRepo

Aug 2024 – Dec 2024

More Yachts

Role Senior Web Engineer

Role description

Developed a high-performance yacht sales application, integrating offers with the accounting system. Implemented modern technologies and best practices to ensure seamless user experience, optimized performance, and a scalable, maintainable codebase.

Tech Stack Spring Boot, Angular 18, TypeScript, SCSS

Jan 2024 – Nov 2024

Oprativ

Role Leading Web Engineer

Role description

As lead web engineer, I designed and implemented a data-driven platform for election data, focusing on multi-step forms and efficient handling of large datasets. I ensured a seamless and responsive user interface, optimized complex workflows, and contributed to building a maintainable and scalable front-end architecture.

Tech Stack Spring Boot, MySQL, Thymeleaf, HTMX, Web Components

Nov 2023 – August 2024

Synofit

Role Leading Full-Stack Web Engineer

Role description

As Lead Engineer, I enhanced a Shopify Hydrogen web application, optimizing performance and server-side communication via the Shopify Headless API. I also implemented SEO improvements and Google Analytics tracking to boost product visibility and provide a seamless online shopping experience.

Tech Stack Shopify Hydrogen (React 18), Contentful, Shopify storefront API, GraphQL, SCSS Modules, Tailwind

Jun 2023 – Dec 2023

Moonbean

Role Front-end Engineer

Role description

I led the creation of a visually stunning application driven by custom animations. I collaborated closely with the design team to translate their vision into seamless, intricate animations that enhance user experience. The project was recognized for winning an award for performance and design on awwwards.com in the USA.

Tech Stack Next JS, GSAP, SCSS, JSON

Jan 2023 – Jun 2023

Arizent

Role Front-end Engineer

Role description

Played a pivotal role in integrating a Preference Center into a multi-brand application using Brightspot CMS. Leveraged Piano.io for user tracking and marketing, creating a centralized hub for managing preferences. Collaborated closely with stakeholders and worked within the existing architecture to enhance the application's capabilities.

Tech Stack Javascript, Web Components, JSON, Handlebars.js, LESS, Brightspot CMS, Piano.io

Mar 2022 – Nov 2024

Inman

Role Full stack Web Engineer

Role description

Demonstrated expertise in maintenance and code enhancement, including leading the implementation of a video gallery and a comprehensive knowledge center. Provided mentorship and constructive feedback to junior colleagues, fostering a collaborative, growth-oriented, and high-performing development environment.

Tech Stack Wordpress, PHP, Javascript, SCSS, Piano.io

Mar 2021 – Feb 2022

Goinstore

Role Front-end Engineer

Role description

Led the integration of CometChat into an existing application, enabling real-time communication within a live streaming context. Implemented features independently while receiving guidance from a senior colleague. Actively identified and applied improvements to enhance user interaction and functionality.

Tech Stack Cometchat React UI kit, Cometchat API, LESS, Web Sockets, Zoid & Post-Robot, HTML, Javascript, Web Components, MySQL

Jul 2020 – Jun 2021

Sideline

Role Front-end Engineer

Role description

Played a pivotal role in the development of a task management application with time tracking. Collaborating under the leadership of a senior colleague, I spearheaded the implementation of project features for both the Minimum Viable Product and the first live version.

Tech Stack React JS, SCSS, MySQL

Freelance web developer

Nov 2018 – Jun 2020

Eurokant

Role Web Engineer

Role description

Led end-to-end development efforts, designing and maintaining a responsive and visually appealing front-end interface.

Tech Stack Wordpress, Elementor Pro, Javascript, CSS

Stile della casa

Role Front-end Engineer

Role description

Overseeing the end-to-end development process, I orchestrated the seamless integration of a comprehensive solution for the e-commerce platform. My responsibilities included leveraging multiple third-party libraries to craft an aesthetically pleasing website with interactive product catalogues.

Tech Stack HTML, SCSS, Javascript

Samac

Role Front-end Engineer

Role description

Collaborative work with cross-functional teams, contributing to project progress and seamless integration.

Tech Stack Wordpress, SCSS, jQuery
