EDUCATION

Faculty of technical sciences, University of Novi Sad

- Bachelor with Honours in Information Technology

2017 – 2021

Novi Sad, Serbia

EXPERIENCE

2021 – Present

- **Java Software Developer**

Valcon

CODE CRAFT

PROJECTS

Lincsafe (2024 – Present)

Vega Microservice

Role Backend Software Engineer

Role description

Developed and maintained a core microservice responsible for inventory management and transaction tracking. Focused on system performance, high availability, and reliable communication with other services. Collaborated with teams and supported onboarding through knowledge-sharing sessions.

Tech Stack Java, Spring Boot, MySQL, Hazelcast, Hibernate, JUnit, RabbitMQ, Docker, Maven, AWS, ELK, Prometheus, Grafana

Data Mapper

Role Backend Software Engineer

Role description

Built and maintained data transformation pipelines for mapping data between services and client-specific formats. Ensured data consistency, integrity, and reliability during processing. Collaborated with clients and internal teams to define requirements and resolve mapping issues.

Tech Stack Java, Spring, Hibernate, Docker, Maven, MySQL

Integration Sender

Role Backend Software Engineer

Role description

Implemented and maintained APIs for reliable communication with third-party systems. Focused on improving message delivery pipelines and ensuring secure integrations. Monitored integrations and supported external teams during setup and troubleshooting.

Tech Stack Java, Spring Boot, RabbitMQ, Docker, Maven, MySQL

Reptile Microservice

Role Backend Software Engineer

Role description

Developed a reporting service capable of processing and analyzing large datasets efficiently. Focused on optimizing performance and ensuring accuracy of generated reports. Implemented testing and monitoring to maintain reliability of reporting pipelines.

Tech Stack Kotlin, RabbitMQ, Docker, Maven, MySQL

Update Server

Role Backend Software Engineer

Role description

Developed a service for managing system updates and version control for deployed devices. Ensured backward compatibility and minimal downtime during update processes. Collaborated with DevOps teams to support CI/CD pipelines and deployment automation.

Tech Stack Java, Spring Boot, Docker, AWS, Maven, MySQL

Schiphol (2023 – 2024)

Project Management Application

Role Backend Software Engineer

Role description

Developed core features for a custom project management platform used across multiple departments. Focused on scalability, data security, and ensuring smooth collaboration between teams. Delivered presentations and documentation to support stakeholders and end-users.

Tech Stack Java, Spring, Hibernate, JUnit, RabbitMQ, Docker, Gradle, PostgreSQL

Coolblue Energy (2021 – 2023)

Abacus Microservice

Role Backend Software Engineer

Role description

Worked on designing and implementing features for a high-volume financial microservice handling daily payment transactions. Focused on improving system performance, stability, and ensuring accurate accounting and reporting processes.

Tech Stack Java, Spring, Hibernate, JUnit, RabbitMQ, Docker, AWS, Jenkins, Gradle, PostgreSQL

Aureus Microservice

Role Backend Software Engineer

Role description

Designed and implemented payment-related functionalities, including integrations with external payment providers and handling refunds and chargebacks. Ensured system reliability and optimized performance for transaction-heavy workflows.

Tech Stack Java, Spring, Hibernate, JUnit, RabbitMQ, Docker, AWS, Jenkins, Gradle, PostgreSQL

Ilios Microservice

Role Backend Software Engineer

Role description

Contributed to redesigning and improving a service focused on solar installation contracts and Salesforce integration. Developed new features and enhanced existing functionalities to align with evolving business needs. Collaborated with multiple teams and supported knowledge transfer for smoother onboarding.

Tech Stack Java, Spring, Hibernate, JUnit, RabbitMQ, Docker, AWS, Jenkins, Gradle, PostgreSQL

Cyrus Microservice

Role Backend Software Engineer

Role description

Maintained and enhanced a reporting microservice used for generating various business reports. Implemented new features and ensured smooth integration with other systems. Focused on code quality, testing, and maintaining clear project documentation.

Tech Stack Java, Spring, Hibernate, JUnit, RabbitMQ, Docker, AWS, Jenkins, Gradle, PostgreSQL
