LEAD SOFTWARE ENGINEER

Highly focused fullstack developer with 20+ years of experience. Specialized in large mission-critical systems, full life-cycle development, and building SPAs with PWA features from the ground up.

S K I L L S

FRONT-END	Angular, AngularJS, React, TypeScript, JavaScript, jQuery, GWT, HTML5, CSS/Sass, Bootstrap
STATE MANAGEMENT	NgRx, Akita, Angularfire, Angular Service Worker, Angular Material
BACK-END	Java, Python, FastAPI, Go, Node.js, Express, Spring, Django REST
DATABASES	MySQL, MSSQL, PostgreSQL, Oracle, Hibernate, Liquibase
MESSAGING	RabbitMQ, ActiveMQ, REST, RPC, SOAP, OAuth2
DEVOPS & TOOLS	Docker, Docker Compose, Kubernetes, AWS, Firebase, Jenkins, Semaphore, Git
TESTING	Karma, Jasmine, JUnit, Mockito, Protractor, JMeter, Cucumber
SERVERS	JBoss/WildFly, NGINX, Apache Tomcat

S P E C I A L I Z E D I N

- Full life-cycle software development: requirements, design, coding, testing, maintenance
- Building SPA with PWA features from the ground up
- Large mission-critical systems and enterprise platforms
- Angular/AngularJS to modern stack migrations

E X P E R I E N C E

2020 – Present

- **Lead Software Engineer**
Codecraft Solutions

2013 – 2020

- **Fullstack Engineer**
Twinsoft, Novi Sad

2005 – 2013

- **Software Engineer / Senior Software Engineer**
Levi9 Global Sourcing, Novi Sad

Miodrag Pavkovic

PROJECTS

May 2026 – Present

Ominimo Insurance

Role Backend Engineer

Role description

Developing the backend infrastructure for a telematics-based usage-based insurance platform. Responsible for designing and implementing RESTful APIs for capturing and processing real-time driving and sensor data to support risk assessment and personalized policy management.

Tech Stack Python, FastAPI, Docker

Oct 2024 – Feb 2026

South Caroline Family Court

Role Tech Lead & Web Architect

Role description

Led the migration of a legacy AngularJS application to Angular 19 for the South Caroline Family Court web platform. Beside the core application, responsible for architecture and implementation of two portal web applications — one public-facing and one accessible exclusively to lawyers and judges. Responsible for defining architectural standards, conducting code reviews, mentoring the development team, and ensuring delivery quality. Provided 24/7 customer support, resolving critical issues and guiding complex implementations.

Tech Stack Angular 19, AngularJS, RxJS, TypeScript, Bootstrap, DevExtreme

Jan 2022 – Oct 2024

Kterio – Building Management System

Role Web Frontend Senior Engineer

Role description

Building management system designed to monitor facility operations, reduce operational costs and optimize energy consumption across managed properties. Responsible for frontend development, architecture decisions and implementation of data-rich monitoring dashboards.

Tech Stack Angular 16, SCSS, TypeScript, Git

Jan 2021 – Sep 2021

Sideline

Role Web Frontend Architect, Engineer & Team Lead

Role description

Sideline is a web application for managing clients, agencies and task requests. Responsible for architecture, development and design as a frontend engineer and team lead.

Tech Stack React 17.x, Bootstrap 4.x, SCSS, MySQL, Docker, OpenAPI, Gitlab

May 2020 – End of 2021

Go Instore – Chat App

Role Web Frontend Engineer & Team Lead

Role description

Two integrated chat products: (1) Chat Web App — chat application integrated inside a web store for numerous retailers, embedded in shop streams as group chat and inside direct video calls as one-to-one chat, improving communication between live advisors and customers. CometChat used as the chat library. (2) Portal App — chat application integrated inside the administrative portal, used by chat moderators and admins of chat groups inside live event streams. Development, design, and team lead responsibilities on both products.

Tech Stack CometChat, React 17.x, ES5, SCSS, MySQL, Bitbucket | Angular 10.x, SCSS, Angular Material, Bitbucket

Sep 2019 – Dec 2019

ETPA – Energy Trade Platform

Role Software Developer

Role description

Trade platform for short-term electricity trades focused on participant capacity. Responsible for support, development and maintenance of backend and frontend functionality, implementing auction book feature and migration from AngularJS to React.

Tech Stack Java 11, Spring 5, Spring Boot 2.x, MongoDB, MariaDB, Axon Framework, React, AngularJS, Material-UI, Gitlab, OpenAPI

Jan 2019 – Jun 2019

Enercity – IAM Identity & Access Management

Role Software Developer

Role description

IAM web service for Germany's largest energy provider. Every service authenticates itself through IAM to access other services and manage them under a given scope. Duties included development, implementation, code testing, reviews, and database migrations.

Tech Stack Go, MySQL, Git, OpenAPI, Trello, Semaphore

Jun 2018 – Dec 2018

Essity – Global Hygiene & Health

Role Web Frontend Software Architect & Developer

Role description

Global hygiene and health company (TENA, Tork, JOBST, Libero, Leukoplast and more). Responsible for development and maintenance across multiple projects, design and code reviews, technical consultancy, deployments, and cross-team support across Sweden, Serbia and India.

Tech Stack TypeScript, Angular 5, Angular CLI, Webpack, Gulp, jQuery, Angular Material, SCSS, HTML5, AWS, MySQL, Swagger

Aug 2017 – Jan 2018

TEKAEF – E-Procurement Platform

Role Full Stack Software Developer

Role description

Market-leading intelligent office solutions provider. B2B e-procurement application using Elasticsearch for fast search and sensitive algorithms for super-fast data import. Led frontend and backend development, upgraded AngularJS to Angular, and provided technical solutions and deployments.

Tech Stack TypeScript, Angular 4, Angular CLI, Angular Material, Java 8, Spring 4.x, Spring Boot, Microservices, Maven, SCSS, HTML5, AWS, Kubernetes, Elasticsearch

2017 – ongoing

Twinsoft – Healthcare Dashboard

Role Architect, Software Developer & Team Lead

Role description

Internal startup project and technology playground. Healthcare dashboard to simplify and automate administration for health care institutions — complete evidence of treatments, patients, medical staff, online reservations and scheduling. Built as Angular 2 and upgraded to latest versions with PWA features. Backend in latest Java and Spring.

Tech Stack Java 8, Spring 4.x, Spring Boot, Gradle, TypeScript, Angular, Angular CLI, Angular Material, Angular Schematics, Angularfire2, Angular Service Worker, Firebase, AWS

2016

DotNet KF – McDonald's Budapest

Role Scrum Master & Technical Team Lead

Role description

Mobile application maintenance for Hungarian McDonald's — functionalities to support ordering and HACCP standards on Motorola devices running Windows OS. Responsibilities included client communication, Scrum mastering, and solution delivery.

Tech Stack .NET, C#, Git

Nov 2013 – Apr 2016

Omnyion YachtCloud

Role Architect, Technical Team Lead & Developer

Role description

Dutch startup offering tailor-made yachting industry solutions. Omnyion is a complete system combining media and user interaction with fully managed device and content allocation, media synchronization across user devices and metadata collection. Led technical direction, introduced methodologies and best practices, conducted code reviews.

Tech Stack AngularJS, Python 2.7, Django, Django REST Framework, Rsync, Kinopoisk, TMDB, Material Design, Git

Mar 2010 – Nov 2013

TomTom – Navigation Platform

Role Software Developer & Team Lead

Role description

World-leading navigation provider. Worked on the Spark project (desktop/mobile navigation app) and the Mumbai architecture (Navigation 3 connectivity between device, server-side and browser). Responsibilities included onsite and nearshore development, client reporting, supporting junior developers.

Tech Stack Java 1.6, Spring 2.5/3.x, Maven 3.0, GWT 2.x, GWT-RPC, mvp4g, REST, CSS3, Jetty, JBoss, Jenkins, Hudson

Jan 2010 – Mar 2010

Acision – Mobile Advertising Platform

Role Software Developer

Role description

Mobile Advertising Platform (MAP) enabling planning, scheduling and execution of advertising campaigns via SMS/MMS/WAP for mobile operators. Short maintenance project — development and maintenance responsibilities.

Tech Stack Java 1.5, Maven 2.2.1, Spring 2.5, Spring Web Flow 2.0, Oracle 11g, JBoss, Hudson, SVN

Aug 2008 – Dec 2009

JobsRepublic – SDU Publishers

Role Software Developer

Role description

Career sites and e-HRM SaaS for Dutch government organizations. Social networking extension for re.Public — network profile and messages. Implemented new functionalities and maintained over 20 recruitment and career sites.

Tech Stack Java 1.6, Velocity, AJAX, Tomcat 6.0, MSSQL, JavaScript, CSS2

May 2007 – Aug 2008

GX.NL – Webmanager CMS

Role Software Developer

Role description

Cooperation with GX.NL core development team on improving and developing the Webmanager CMS platform. Migrating architecture to a component model (WCB) based on OSGi (Apache Felix), Maven/Continuum, using JCR API (Apache Jackrabbit). Agile/Scrum.

Tech Stack Java, Spring, OSGi (Felix), JCR, JSTL, XML, XSL, JavaScript, Ajax, Maven, Ant, Tomcat, SVN

Nov 2005 – May 2007

Levi9 – Internal Projects

Role Software Developer

Role description

Multiple projects: Levi9 website based on Hippo CMS, Didactor 2.0 e-learning framework (MMBase CMS), and a set of 20+ websites based on WebPress CMS. SMS Gateway application for internal corporate needs — web, web service and email interfaces.

Tech Stack Java, JSP, MMBASE, Hippo CMS, Apache Cocoon, XML, XSL, PHP, ASP, WebPress, Frontier, JavaScript, CSS2
