EDUCATION

Faculty of Technical Sciences, University of
Novi Sad

- Bachelor with Honours in Information
Technology
2017 – 2021
Novi Sad, Serbia

BACKEND ENGINEER

Fast learner with strong ability to quickly adapt to complex distributed systems and understand business-critical requirements across different domains.

SKILLS

LANGUAGES	Java (11–24), Kotlin
FRAMEWORKS	Spring, Spring Boot, Hibernate
MESSAGING	RabbitMQ
DATABASES	MySQL, PostgreSQL, Redis, Hazelcast
DEVOPS & TOOLS	Docker, Kubernetes, AWS, Jenkins, Maven, Gradle, Git, Bitbucket, GitLab, TeamCity, Woodpecker
MONITORING	ELK, Prometheus, Grafana
TESTING	JUnit
PROJECT TOOLS	JIRA, Confluence

SPECIALIZED IN

- Designing and building distributed microservice architectures
- Backend systems for data synchronisation and third-party integrations
- Team leadership, code reviews, and mentoring
- Reducing technical debt and improving system performance

EXPERIENCE

2025 – Present

- **Team Lead / Backend Software Engineer**
Codecraft Solutions / Oakland / Randstad

2021 – 2025

- **Java Software Developer**
Valcon

Darko Karpić

PROJECTS

Oakland / Randstad — HR Service Industry

2025 – Present

HR Service Platform

Role Team Lead / Backend Software Engineer

Role description

Designing, planning and implementation of over 20 microservices with various domains and purposes — data synchronisation, communication with 3rd party systems, etc. Integration with various third-party systems for retrieval of agency and employee data. Discussion & architecture review with architects and cooperation with other teams. Supporting team members, code reviews and writing automation tests. Reducing technical debt and documenting processes.

Tech Stack Java 11–24, Spring 5/6, RabbitMQ, Kubernetes, Docker, Redis, Maven, MySQL, Bitbucket, GitLab, Woodpecker, TeamCity, JIRA, Confluence

Lincsafe

2024 – 2025

Vega Microservice

Role Backend Software Engineer

Role description

Developed and maintained a core microservice responsible for inventory management and transaction tracking. Focused on system performance, high availability, and reliable communication with other services. Collaborated with teams and supported onboarding through knowledge-sharing sessions.

Tech Stack Java, Spring Boot, MySQL, Hazelcast, Hibernate, JUnit, RabbitMQ, Docker, Maven, AWS, ELK, Prometheus, Grafana

Data Mapper

Role Backend Software Engineer

Role description

Built and maintained data transformation pipelines for mapping data between services and client-specific formats. Ensured data consistency, integrity, and reliability during processing. Collaborated with clients and internal teams to define requirements and resolve mapping issues.

Tech Stack Java, Spring, Hibernate, Docker, Maven, MySQL

Integration Sender

Role Backend Software Engineer

Role description

Implemented and maintained APIs for reliable communication with third-party systems. Focused on improving message delivery pipelines and ensuring secure integrations. Monitored integrations and supported external teams during setup and troubleshooting.

Tech Stack Java, Spring Boot, RabbitMQ, Docker, Maven, MySQL

Reptile Microservice

Role Backend Software Engineer

Role description

Developed a reporting service capable of processing and analyzing large datasets efficiently. Focused on optimizing performance and ensuring accuracy of generated reports. Implemented testing and monitoring to maintain reliability of reporting pipelines.

Tech Stack Kotlin, RabbitMQ, Docker, Maven, MySQL

Update Server

Role Backend Software Engineer

Role description

Developed a service for managing system updates and version control for deployed devices. Ensured backward compatibility and minimal downtime during update processes. Collaborated with DevOps teams to support CI/CD pipelines and deployment automation.

Tech Stack Java, Spring Boot, Docker, AWS, Maven, MySQL

Schiphol

2023 – 2024

Project Management Application

Role Backend Software Engineer

Role description

Developed core features for a custom project management platform used across multiple departments. Focused on scalability, data security, and ensuring smooth collaboration between teams. Delivered presentations and documentation to support stakeholders and end-users.

Tech Stack Java, Spring, Hibernate, JUnit, RabbitMQ, Docker, Gradle, PostgreSQL

Coolblue Energy

2021 – 2023

Abacus Microservice

Role Backend Software Engineer

Role description

Worked on designing and implementing features for a high-volume financial microservice handling daily payment transactions. Focused on improving system performance, stability, and ensuring accurate accounting and reporting processes.

Tech Stack Java, Spring, Hibernate, JUnit, RabbitMQ, Docker, AWS, Jenkins, Gradle, PostgreSQL

Aureus Microservice

Role Backend Software Engineer

Role description

Designed and implemented payment-related functionalities, including integrations with external payment providers and handling refunds and chargebacks. Ensured system reliability and optimized performance for transaction-heavy workflows.

Tech Stack Java, Spring, Hibernate, JUnit, RabbitMQ, Docker, AWS, Jenkins, Gradle, PostgreSQL

Ilios Microservice

Role Backend Software Engineer

Role description

Contributed to redesigning and improving a service focused on solar installation contracts and Salesforce integration. Developed new features and enhanced existing functionalities to align with evolving business needs. Collaborated with multiple teams and supported knowledge transfer for smoother onboarding.

Tech Stack Java, Spring, Hibernate, JUnit, RabbitMQ, Docker, AWS, Jenkins, Gradle, PostgreSQL

Cyrus Microservice

Role Backend Software Engineer

Role description

Maintained and enhanced a reporting microservice used for generating various business reports. Implemented new features and ensured smooth integration with other systems. Focused on code quality, testing, and maintaining clear project documentation.

Tech Stack Java, Spring, Hibernate, JUnit, RabbitMQ, Docker, AWS, Jenkins, Gradle, PostgreSQL
